

SOCIETALLY INFLUENTIAL TEACHING AND RESEARCH

The University of Tampere School of Education focuses on societally oriented research into education.

In our educational programme, we are dedicated to accumulating research-based competence and developing the identity of our students as teachers and experts of education. Our goal is to educate socially and culturally aware, critically thinking experts who understand themselves and the world around them. Our graduates have both the ability and the will to become lifelong learners, and their aim is to work to help develop communities and society.

The School provides expertise in collaborative working methods. The teachers and researchers of the School have the ability to promote the development of expertise, training, teaching and research of their collaboration partners.

We have experience in project collaboration on a local, national and transnational level. We welcome the role of project partner, and we also have the ability and resources to lead and coordinate large-scale transnational projects.

UNIVERSITY OF TAMPERE SCHOOL OF EDUCATION

The research and learning community at the School of Education explores and analyses the current state of and changes in education and society. Research is conducted in both national and transnational environments.

The focus areas of our research are

- Education policy
- Educational and learning environments
- Citizenship and participation
- Professional growth and development

The School of Education educates kindergarten teachers and early childhood education specialists, primary school class teachers, secondary and upper-secondary school subject teachers as well as experts in lifelong learning and vocology. For the teachers and researchers of the University of Tampere, we provide education in university pedagogy.

As fee-based services, the School of Education provides continuing education in the field of educational sciences. In addition, the School offers education and development programmes in Finland and abroad.

UNIVERSITY
OF TAMPERE

WE EDUCATE FOR THE FUTURE

Teacher students receive their practical training at the Teacher Training School at the University of Tampere.

We understand the importance of art and culture in society and accordingly provide education in arts, crafts and physical education.

Our international activities include a teacher qualification programme for students with immigrant background.

Our students graduate as kindergarten teachers and early childhood education specialists, primary school class teachers, secondary and upper-secondary school subject teachers, and experts in lifelong learning and vocology.

The University of Tampere School of Education educates societally oriented experts in a broad range of subjects in the educational sciences and the teaching profession capable of functioning in the networked global information society in a highly ethical manner.
